

If you are using Ubuntu 11.0+ the easiest method is to use the Ubuntu Software Center.

1. From the Ubuntu Software Center, search for Wine. If you are using a different Linux Distro please visit the WINE website: <http://www.winehq.org/download> <http://wiki.winehq.org/HowTo>
- 2.

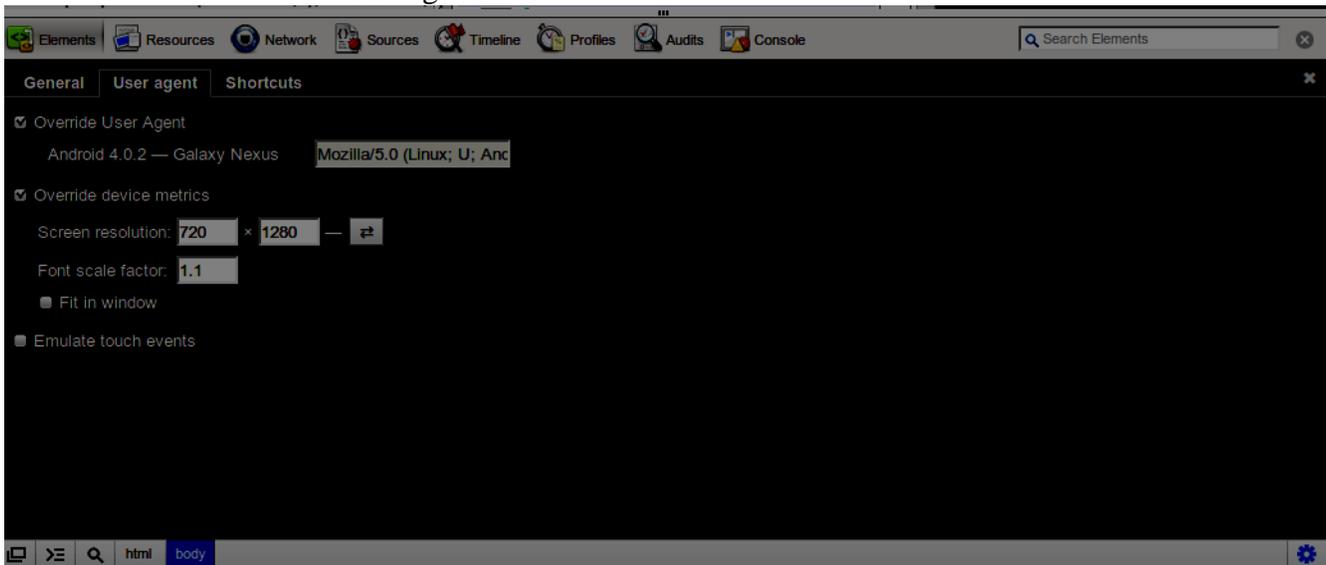

3. Install Wine Windows Program Loader. (Ubuntu will also install Winetricks.)
4. Leave all settings at default.
5. After the Wine installation has completed you will need to manually download the Adobe Digital Editions .exe file
6. Go here <http://helpx.adobe.com/digital-editions/kb/cant-install-digital-editions.html>
7. Under Windows Solutions/Manually install Adobe Digital Editions for Window, use the provided URL to download the .exe file.
8. (Note for TS: try not to send the actual DL URL for the .exe file. Adobe can change that URL any time, but they are not likely to change the help page. )
9. Save the file to a location that is easy to find.
10. After the file has downloaded, right-click the ADE .exe file and select "Open With Wine Windows Program Loader"
11. Alternative to right-click installation: Open Winetricks, select Install App, Select OK, Adobe Digital Editions should appear, select it, Select OK, and then it will install.

12. Follow the Wizard to complete the installation. (Also be sure to Authorize ADE with your Adobe ID).
13. You should not have to change your USER AGENT on your browser to Download the .ACSM from ebrary.
14. (Note for TS: Firefox users can download an add-on to change their user agent: <https://addons.mozilla.org/en-US/firefox/search/?q=user+agent&appver=14.0.1&platform=linux>  
Chrome users can change their user agent :
1. open the Developer Tools (Ctrl+Shift+I on Windows/Linux, Command - Option - I on Mac OS X)

2. click the "settings" icon at the bottom of the window – the Blue Sprocket in the bottom right.
3. check "override user agent" and select one of the options (Internet Explorer 7/8/9, Firefox 4/7 for Windows/Mac, iPhone, iPad and Nexus S running Android 2.3). You can also select "other" and enter a custom user agent.

2.

After you download the .acsm, you can either open it with ADE or drag and drop the file into ADE.
