

Welcome to Science and Medicine Dispatch, the monthly newsletter bringing you items of interest from the Science and Health Care Libraries of Oxford University. Subscribe by sending a blank email to rsl-and-hcl-newsletter-subscribe@maillist.ox.ac.uk, or contact newsletter.rsl@bodleian.ox.ac.uk. The newsletter can also be read online at www.bodleian.ox.ac.uk/science/about/science-and-medicine-dispatch

What's new

- Oxford Open Access Service Design Project**
 The University's Research Committee has approved setting up the Oxford Open Access Service Design Project led by the Bodleian Libraries. The overarching aim is to make it easy for Oxford authors to send manuscripts to the Bodleian Open Access Team. Further details can be found at <http://tinyurl.com/m2trff4>
- Weston Library opening hours**
 It is planned that reading rooms in the new Weston Library will be open from 22nd September 2014. Proposed opening hours for all parts of the Weston Library can be found at <http://tinyurl.com/nrr7clt>.

Opening Hours (Vacation)

Monday to Friday 8:30am-7pm

Saturdays 10am-2pm

Sundays closed

10 years of Scopus

[Scopus](http://www.scopus.com) from Elsevier is celebrating its 10th anniversary this year. This is one of the key databases of peer-reviewed literature focusing on science and medicine subscribed to by the Bodleian Libraries.

Features include citation tracking, bibliometric analysis including [SCImago Journal Rank](http://www.scopus.com), and export to RefWorks, EndNote and Mendeley.

Further details can be found at <http://10.scopus.com/>

Catalogue of the Bodmer Archive

The catalogue of the archive of human and medical geneticists Sir Walter Bodmer and Lady Julia Bodmer is now available to researchers at <http://tinyurl.com/pgab9vc>.

Further information on this project can be found at <http://tinyurl.com/nwsfb32>.

The project to catalogue the papers comes under the [Saving Oxford Medicine](http://www.bodleian.ox.ac.uk/science/) initiative, which aims to record key sources for the recent history of medicine in Oxford. The Bodmer archive has been catalogued during a time of wider national effort by archivists to preserve the documentary heritage of genetics and genomics, and has been generously supported by the Wellcome Trust.

Library Focus Groups for MSD – we'd like to get to know you better!

The Health Care Libraries would like you to share your thoughts about ways to improve our library services, collections, and spaces to help you in your studies and research.

We're planning a series of **focus groups** and **surveys** with different groups in the **Medical Science Division** over the next few months. We're particularly interested in hearing about:

- What can we do for you to support your studies and research?
- Your awareness of our services – for example, did you know we already....
- In an ideal world, what would you like us to offer you?

This is a great opportunity for you to tell us about improvements we can make, how we can work with you, and whether there's anything new we can do for you. If we can, we want to make any changes that come up in our discussions.

We'll be contacting departments over the summer looking for people to take part.

Keep an eye out for us announcing more information, or if you'd like to register your interest please contact us at

hcl-enquiries@bodleian.ox.ac.uk

New edition of Vesalius *The Fabric of the Human Body* to be exhibited

The Science and Health Care Libraries are pleased to announce that we are displaying a new edition of *De Humani Corporis Fabrica* (*The Fabric of the Human Body*), by **Andreas Vesalius** (1514 – 1564) - an annotated translation (2012) by D. H. Garrison and M. H. Hast.

It was purchased thanks to the generosity of donors, including the Friends of the Bodleian, and will initially be displayed in the **Cairns Library** at the John Radcliffe Hospital, before being transferred to the **Radcliffe Science Library**.

Vesalius is a major figure in medical history thanks to his ground breaking work in anatomy, and *Fabrica* is one of the most important books in the history of medicine as it fostered a radical shift in anatomical and medical thinking.

This new English translation is timed to mark the 500th anniversary of his birth, and incorporates the 1543 and 1555 editions as well as Vesalius' later annotations, showing the development of his thoughts and findings and which aspects of traditional knowledge he accepted and rejected.

More information can be found at www.vesalius-fabrica.com.

Contact us at hcl-enquiries@bodleian.ox.ac.uk or 01865 221936 to check opening times or arrange a visit.
