

You can easily print files on your USB stick when working on a library computer. It is also possible to print certain files on your USB direct from the copiers.

It is only possible to print **PDF**, **TIFF**, and **JPEG** files directly at the machine.

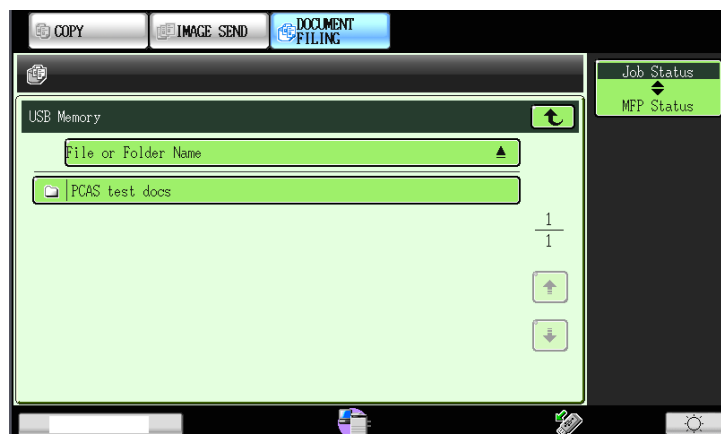

1. From your initial screen select *B&W copying and scanning* or *Colour copying and scanning*

2. Select *Document Filing* and then the *Ex Data Access* Tab

The device will look up Folders on your USB stick and PDF, TIFF, and JPEG files

4. Select the file you want to Print.

5. From the next screen select how many prints you want by using the UP or DOWN arrows and select Print. You can also select the print to be Black and White by selecting the checkbox

6. Make sure you logout after printing.
