

Copying Non-standard Book Sizes

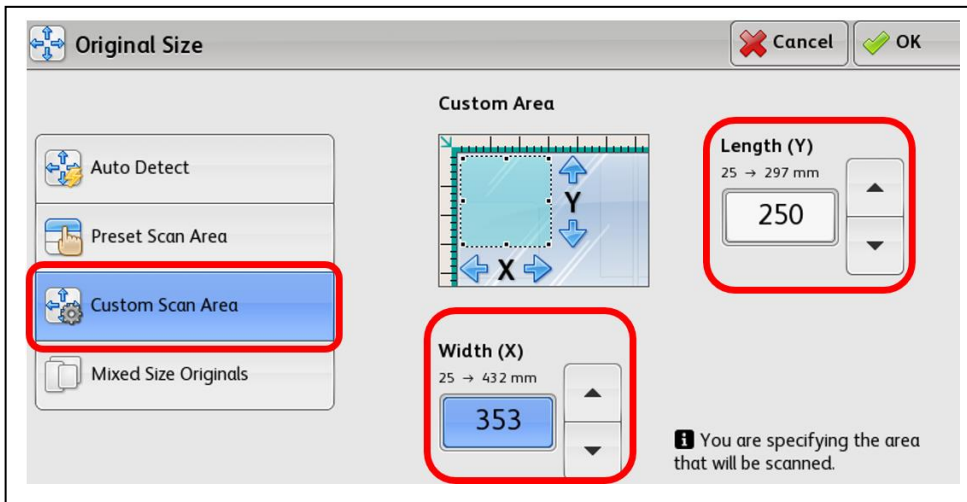

The following adjustments can be made for photocopying and scanning non-standard book sizes. You need to set the areas to be copied and then, if photocopying, select the size of paper.

Select **Layout Adjustment** tab

Select **Original Size**

Select **Custom Scan Area**

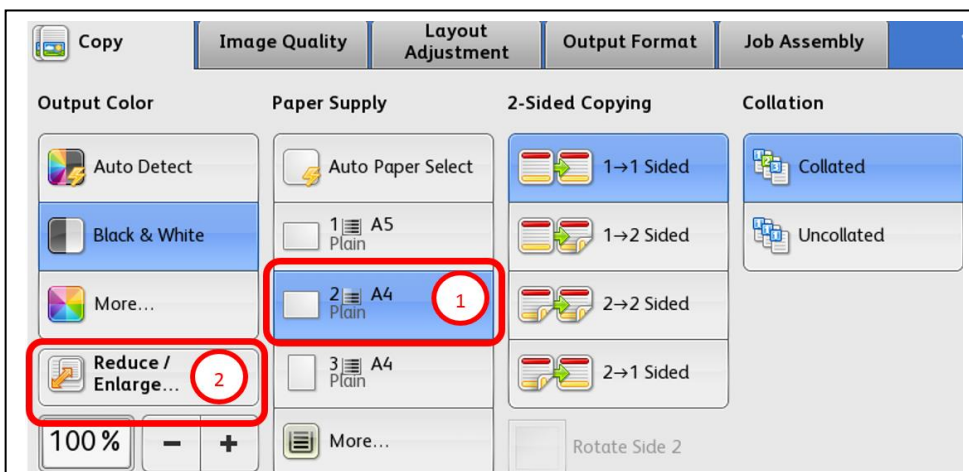

Adjust the length and width coordinates using the scale on the glass. E.g.

- For books a bit larger than A4 use B4 settings: **250 long (Y) x 353 wide (X)**
- For smaller books try A5: **210 long x 148 wide**

Select **OK**

You are now ready to begin scanning. Press the green start button.

The following steps required for photocopying

Select **Copy** tab

1. First, select required paper size of copy, e.g. A4
2. Second, select **Reduce/Enlarge**

Select **Auto %**

Select **OK**

The device will now copy the designated area to the selected paper size.

Press the green start button to begin copying.
