

You can print files on your USB stick when working on a library computer. It is also possible to print certain files on your USB direct from the copiers.

It is only possible to print **PDF**, **TIFF**, and **JPEG** files directly at the machine.

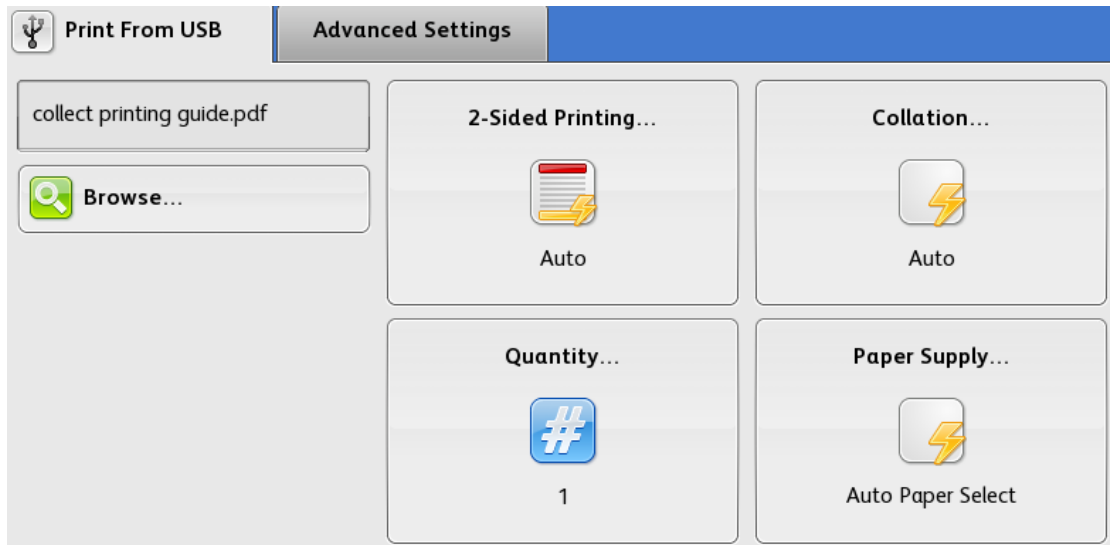

1. Log in to the copier and, from your initial screen, select *Print From USB* and insert your USB stick.

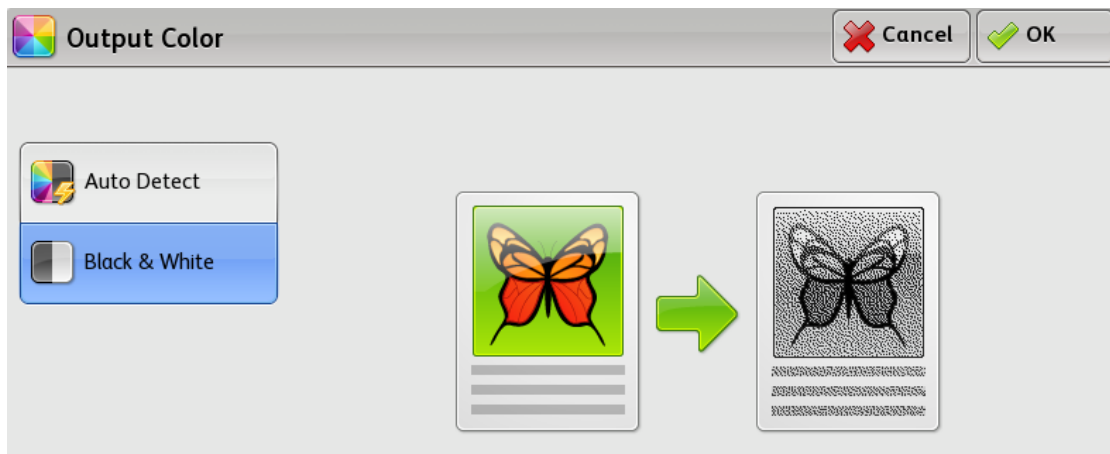

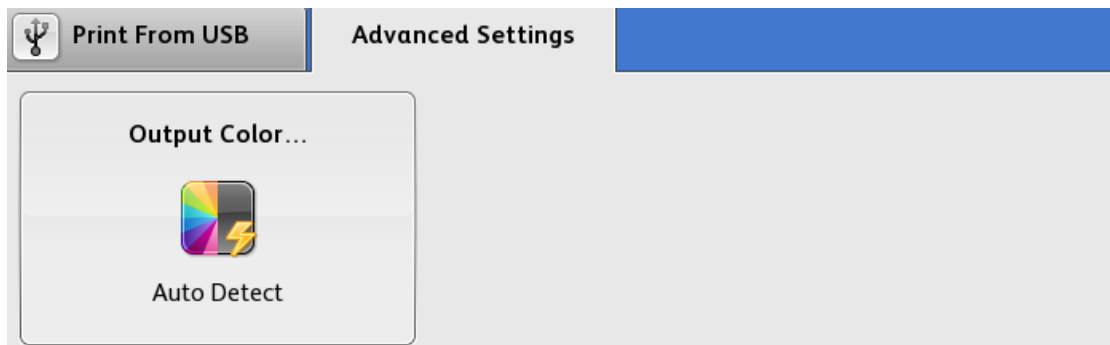

2. The device will look up **Folders** on your USB stick and PDF, TIFF, and JPEG files

4. Select the file you want to print, opening the relevant folder if necessary.
5. From the next screen choose print options, number of prints required, double/single sided, paper size, etc.

6. Colour and Black & White options are available from the Advanced Settings tab.

7. Make sure you logout after printing.
