## DIE-CUT BOXES

These boxes are made from board which is low in reducible sulphur and other oxidising elements, free from optical brightening agents, and is laminated with a specially produced pH 7, plasticiser-free, EVA adhesive. Lightfast, 5 to 6 on the blue wool scale, the paper is buffered with calcium carbonate and has an average pH value of 7.5 to 8.5. Board thickness is 1250 microns.

### PRICES as of August 2020

Code	Internal H x W x D in mm	Price per item
D8 [A4]	311 x 222 x 70	£5.50

## DIE-CUT ENVELOPES

The envelopes are wallet style with two side S seams to provide rigidity and avoid pressure marks. With regard to the measurements given, please note that to avoid unnecessary damage during use the envelopes are embossed with a border line to indicate the maximum advisable size of item the envelope should contain. The thickness of the card is 305 microns.
