CLOTH COVERED BOXES

The lid and trays of these boxes are twinned walled and stepped jointed. The lid and tray are integrally attached to the case and for extra strength a one piece liner is incorporated.

The board is supplied by Conservation By Design and is 100% recycled archival paper and board waste; 100% chemically purified wood free fibre; pH 7 - 7.5; acid free lignin free; O.B.A free; and light fast. 1.5 mm is used for small to medium boxes and 1.9 mm is used for large to special size boxes.

We use acrylic archive buckram supplied by FiberMark. The cloth is double warp 100% cotton buckram coated with a pigmented acrylic basecoat and clear methyl methacrylate gloss to give a wipeable surface which is resistant to scuffing and abrasion. The cloth is termite and mould resistant. We can provide boxes in a limited range of colours but are happy to discuss colour requirements.

EVA adhesive is used throughout the construction of the box.

Boxes can be labelled with gold foil for £10 each.

PRICES as of August 2020

Dimensions	Price standard / pressure flap
Up to 500 mm height/width	£150 / £200

Prices exc. VAT @ 20%
