Introduction

The Haitian Revolution has continually triggered scholarly (and literary) interest since its inception, thanks to its unique blend of racial, international, and political factors. But it has remained largely peripheral to distinctive historical narratives. In particular, Saint-Domingue and Haiti are interwoven with the narrative of the French Revolution, to which they were closely connected, in the literature until the end of the 20th century. Aside from a few precursors, increased attention to the Haitian Revolution emerged only with the commemoration of the bicentennial of the French Revolution in 1989. Yet it was the coming of the bicentennial of Haiti's independence in 2004 that inspired numerous authors on both sides of the Allantic to scrutinize the topic. On the French side, scholarly production mainly consisted of collections of essays connected to commemorative conferences. French Caribbean scholars based in Martinique and Guadeloupe also contributed to this considerable effort, together with Haitian scholars, for whom, of course, the revolution was a foundational event. On the American side, the production of collections of essays accompanied the publication of major monographs. Recent North American interest in Haiti can be linked to the development of the Atlantic paradigm, which has induced younger writers to focus on a non-British Atlantic. On both sides of the Atlantic and in the Caribbean, new research on Haiti is linked to the dominant historiographical question of slavery (in all its dimensions, social, political, and cultural). together with rising sensitivity to questions of hybridity, creolization, and colonial and postcolonial discussions in literature, philosophy, and cultural studies. Far from remaining peripheral, the Haitian Revolution has thus rapidly moved to the center of historical attention. It remains a vivid symbol of black resistance and identity for contemporary Haiti, the Caribbean, and beyond, which explains why a number of authors on the revolution (mainly in French) are also novelists, playwrights, poets, journalists, or philosophers.

Find Print Edition in

A noble Japanese family whose members enjoyed the patronage of the Japanese emperors. In 858 Fujiwara Yoshifusa became the first non-imperial regent for a child emperor. Soon it was customary for every emperor to have a Fujiwara regent. For about three centuries they dominated the court of Kyoto, securing their power by marrying their daughters into the imperial family.

The Fujiwara period (late 9th to late 12th century) saw great artistic and literary development. A court lady, Lady Murasaki, wrote Japan's most famous classic novel *The Tale of Genji* (c.1001–15). But the central administration Prince Shotoku had initiated in the 7th century was breaking down into a near feudal society. Tax-free estates proliferated and warrior families came to prominence. The establishment of the Kamakura shogunate marked the end of Fujiwara ascendancy, though they acted as important court officials until the Meiji period in the 19th century.

difference in the end.

Philip Goodhart, a joint secrethe 1922 committee, who was to vocated a referendum in opposisettled Government and party intends to offer his essay to the oup for publication in Crossbow ext year. And Mr. Norman St. evas, the devil's advocate on the ide, is a polemicist who never utlets. Here or there, soon or tournament will take place. theless, I regret the blackball no doubt idiosynare reasons. would have a debate matching two welled champions between the covers book not because my mind needs up but because I find myself

enough continental examples of referenda to make it a strange objection on the lips of British Europeans who are comprehensively recommending to the electorate the adoption of the European way of doing things.

I thought I fell over the same kind of stumbling-block the other day when I followed in the footsteps of Mr. St. John-Stevas as he argued that the referendum (I paraphrase and condense) is an alien device that has no part in the British constitution and would not fit into it. Where the electors are eventually to be asked to adopt so much that is no part of the British constitution, if they leave it to Mr. St. John-Stevas, a referendum might seem to some electors a mere gnat for the

point that a referendum seems attractive to those anti-Market politicians who are by no means sure that they can win a majority against the Treaty of Rome in Parliament. That may well be part of the thinking of Mr. Douglas Jay, Mr. Neil Marten, and their all party anti-Market group, and of Mr. Wedgwood Benn, who has never been numbered by me among the warmest of Europeans. But it gets us nowhere. Mr. Jay and the rest will fairly retort that Mr. Heath, Mr. Wilson, and all the Europeans oppose a referendum because they fear that they could not carry a majority outside in the country. That, also, might have a grain of truth in it, when the hour of decision comes,

All in all I remain profoundly con-
