Open Access Oxford

New Wellcome Trust Open Access Policy

Hilary 2021
OA policy: summary

• All original research articles supported in whole, or in part, by Wellcome must be:
  • made freely available through PubMed Central (PMC) and Europe PMC by the official final publication date

And

• published under a Creative Commons attribution licence (CC BY), unless we have agreed, as an exception, to allow publication under a CC BY-ND licence.

• Policy applies to all research articles submitted for publication from 1 January 2021
OA policy: other elements

- All research articles supported in whole, or in part, by Wellcome must include a **statement** explaining how other researchers can access any **data, original software or materials** underpinning the research.

- We are committed to making sure that when we assess research outputs during funding decisions, we consider the **intrinsic merit of the work**, not the title of the journal or publisher. All Wellcome-funded institutions have to commit to this principle.

- Researchers and organisations who do not comply with the OA policy will be subject to appropriate **sanctions**. These may include Wellcome:
  - not accepting new grant applications
  - suspending funding to organisations in extreme cases
What’s changed for research articles?

wellcome.org  | @wellcometrust
Route 1 – Publish in an OA journal/platform

- Publish in any fully OA journal, indexed by Directory of OA Journals (DOAJ)
- Examples include eLife, PLOS, Nature Communications, Wellcome Open Research etc etc.
- OA fee will be met by Wellcome
Route 2 – The repository route

- Publish in any peer reviewed journal and make the **Author Accepted Manuscript** (AAM), in Europe PMC at the time of publication with a CC BY licence. The updated grant conditions give you the right to do so.

- As the CC BY licence to the future AAM was already in place, prior to the publication agreement with the author, **that prior CC BY licence will trump any conflicting language** in the publication agreement.

- We require you to include the following statement on all submissions of original research to peer-reviewed journals:

  ‘This research was funded in whole, or in part, by the Wellcome Trust [Grant number]. **For the purpose of Open Access, the author has applied a CC BY public copyright licence to any Author Accepted Manuscript version arising from this submission.**’

- Deposit your AAMs at Europe PMC plus

- In cases where the **Version of Record** is made OA (Routes 1 and 3) there is no need to deposit the AAM at Europe PMC.
Route 3 – Transformative Arrangements

- Transformative Arrangements are publishing models where the subscription publisher is committed to transitioning to OA
- Various approaches supported including “Read and Publish”, “Subscribe to Open” and “Transformative Journals”
- The University currently has agreements which cover over 6,000 journals with the following publishers – American Physiological Society, Bioscientifica, Brill, Cold Spring Harbor Laboratories, Company of Biologists, Institute of Physics Publishing, Microbiology Society, Portland Press, Rockefeller University Press, Royal Society, SAGE, Springer and Wiley.

Details of Oxford’s agreements with publishers can be found on the OA Oxford website:
http://openaccess.ox.ac.uk/home-2/what-do-i-need-to-do/read-and-publish-deals/

⚠️ This compliance route is time limited and will end by December 2024.
The block grant

- Wellcome will continue to provide annual OA block grants to UK organisations & research institutes

- Article Processing Charges (APCs) associated with fully OA journals & platforms

- APCs for Transformative journals

- APCs for articles published in subscription journals which have been submitted for publication before 1st January 2021.
Journal Checker Tool

• A web tool developed by cOAlition S, to support all researchers who need to comply with a Plan S OA policy- beta release 11/2020

• Aiming for global coverage of journals, starting with the 200 publishers that publish 95% of cOAlition S funded research (very close coverage to Wellcome’s top 200)

• Goal to help researchers identify which of the routes to open access compliance is available to them

• How you comply may change over time – check each time before you submit!

https://journalcheckertool.org/
Is this compliant with Plan S?
