For libraries, archives,
museums, and individuals
around the world

Creative and pioneering solutions from the University of Oxford

CONSERVATION PACKAGING

The Packaging and Delivery Service (PADS) design, manufacture, and supply a range of conservation packaging products for libraries, archives, and museums.

PADS use state of the art Kasemake machines and software to produce bespoke packaging solutions efficiently and quickly. The team prides itself in providing a value-for-money and easy-to-use service.

QUALITY MATERIALS AND DESIGNS

PADS use materials only of the highest quality which meet stringent conservation standards such as box board, 100% cotton museum board, and Plastazote®.

Our extensive knowledge and expertise result in interesting, attractive, and practical designs to safeguard library, archive, and museum artefacts.

Plastazote cutting

Cloth covered box
