

Exporting references from Google Scholar to RefWorks

Google Scholar

Google Scholar is a search engine which allows quick and simple searching of scholarly literature, including articles, books, theses and conference abstracts. It draws material from journal publishers, professional associations, universities and open access repositories.

Google Scholar Subject Coverage

Google Scholar is an interdisciplinary resource which covers all academic disciplines.

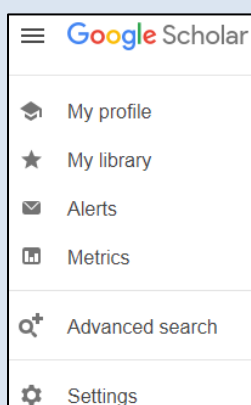

Accessing Google Scholar

Google Scholar is freely available on the Web via <https://scholar.google.co.uk/>

Configuring Google Scholar for RefWorks

You can configure Google Scholar to link directly to RefWorks.

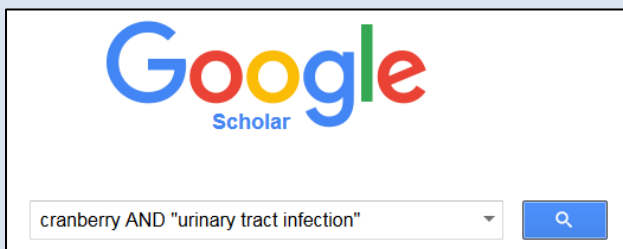

- At the top of the Google Scholar screen, click on the three-bar menu button then click **Settings**.

- Scroll down to Bibliography Manager and click on the drop down menu to choose to “Show links to import citations into RefWorks”.
- Click “Save”.

Running a Basic Search

- Type your keywords into the search box and click on the blue magnifying glass icon.

- After a few moments, a set of search results will appear below the search box.

Exporting to RefWorks

Google Scholar allows you to export individual references into RefWorks.

- You will see a link to “Import into RefWorks” beneath each reference – click on the link. In some browsers, the “Import into RefWorks” isn’t visible – click on the “>>” link to access this option.

[LP-2: High Performance LCD Backlighting using High Intensity Red, Green and Blue Light Emitting Diodes](#)

G Harbers, C Hoelen - SID Symposium Digest of Technical ..., 2001 - Wiley Online Library

By using red, green, and **blue** (RGB) **light** emitting diodes (LEDs) instead of cold cathode fluorescent lamps in edge lit LCD backlights brightness and color performance (gamut) of LCD displays can be improved considerably. However: the design of an RGB-LED backlight ...
