

Exporting references from JSTOR to RefWorks

JSTOR

JSTOR provides access to journal articles, primary resources and books covering a range of subject areas including arts, languages, literature, film and history.

Accessing JSTOR

JSTOR can be accessed by searching for 'JSTOR' in SOLO (<http://solo.bodleian.ox.ac.uk/>) and then following the 'Online access' link. The database can also be found through Databases A-Z (<https://libguides.bodleian.ox.ac.uk/az.php>). As JSTOR is a subscription database, if you are off campus you will need to use your Oxford Single Sign On (SSO) credentials to use it.

Running a Basic Search

When you enter JSTOR, you will land on the main search page. Type your search query into the search bar and hit enter.

Selecting and Exporting Records

There are two methods for exporting references to RefWorks.

Method 1: Exporting multiple references in one go

1. Select the references that you would like to export to RefWorks by ticking the relevant boxes.
2. Click on 'Export Selected Citations' which will provide a dropdown list.
3. Select 'Export to RefWorks'.

The screenshot shows a search results interface. On the left, there is a sidebar with a date filter and a list of subject categories with checkboxes. The main area displays two search results, each with a checked checkbox. The first result is a journal article titled 'What Is the History of Books?' by Robert Darnton. The second result is 'INFORMATION TECHNOLOGY AND ECONOMIC CHANGE: THE IMPACT OF THE PRINTING PRESS' by Jeremiah E. Dittmar. A red button labeled 'Export Selected Citations' is positioned above a dropdown menu. The dropdown menu is open, showing several options: 'Export to NoodleTools', 'Export to RefWorks' (highlighted in red), 'Export to EasyBib', 'Export a RIS file (For EndNote, ProCite, Reference Manager, Zotero, Mendeley...)', and 'Export a Text file (For BibTex)'. Below the dropdown menu, there is a red 'Download PDF' button, a 'Save' button, and a 'Cite' button.

4. You may be given the option to save to RefWorks or Legacy RefWorks. Choose 'Yes, export to the newest version of RefWorks'. Do not export to Legacy RefWorks.
5. RefWorks will open in your browser and display a message to ask which folder you would like the references to go into. Make your selection and click 'Import'. RefWorks will indicate that the references have been successfully imported. You can view the added records by clicking 'OK' at the bottom of the import message. You can also access the last imported folder by clicking on it at the left side of the RefWorks screen.

Method 2: Exporting a single reference

1. When you have found a reference that you would like to export to RefWorks, click the 'Cite This Item' button to the right of the reference in the results screen.

The screenshot shows a search results interface. On the left, there are filters for 'FROM' and 'TO' dates, and a 'SUBJECT' list with checkboxes for African American Studies, African Studies, Agriculture, and American Indian Studies. The main area displays a search result for 'What Is the History of Books?' by Robert Darnton, from the journal *Daedalus*. To the right of the article title, there are buttons for 'Download PDF', 'Save', and 'Cite'. The 'Cite' button is circled in red.

2. A pop-up window will appear with options for citation and a choice of methods for exportation. Click 'Export to RefWorks'.

The screenshot shows a 'Cite This Item' pop-up window. It has a close button (X) in the top right corner. Under the heading 'Copy Citation', there are three text boxes for 'MLA', 'APA', and 'CHICAGO', each with a 'Loading...' status and a 'Copy' button. Below this, under the heading 'Export Citation', there are several options: 'Export to NoodleTools', 'Export to RefWorks' (circled in red), 'Export to EasyBib', 'Export a RIS file (For EndNote, ProCite, Reference Manager, Zotero, Mendeley...)', and 'Export a Text file (For BibTex)'.

3. You may be given the option to save to RefWorks or Legacy RefWorks. Choose 'Yes, export to the newest version of RefWorks'. Do not export to Legacy RefWorks.

4. RefWorks will open in your browser and display a message to ask which folder you would like the references to go into. Make your selection and click 'Import'. RefWorks will indicate that the references have been successfully imported. You can view the added records by clicking 'OK' at the bottom of the import message. You can also access the last imported folder by clicking on it at the left side of the RefWorks screen.
